

“...Easy and more reliable to use SOKKIA instruments...”

COMPANY

Bin Ham Enterprises Group was founded in 1990 as a related group concern to Bin Ham Group which was established in 1974. Sheikh Mubarak Bin Ham (Phd) the chairman of Bin Ham Enterprises Group has re-planned the group organization to cover the target activities and build business cooperations, association on principal factors of quality end-result using their traditional skills, values, and modern technology, supported with the clients and their professional advisers.

PROJECT SCOPE

The scope of works for this contract comprises construction, completion and remedying of defects for the proposed 217 villas for W'ahat Al Zaweya project in Al Ain, U.A.E for three bed room villa with swimming pool, four bed room villa with majlis & swimming pool, normal compound wall, decorative compound wall, structural & architectural works, electrical works, mechanical works, and testing & commissioning works.

Ibrahim Yahya , Chief Surveyor , Bin Ham Enterprises Group

“For such huge projects, it is the company's top priority to procure adequate and reliable instruments at reasonable service. The process includes support from the manufacturer and supplier to help the projects run smoother that will allow us to consider the same brand for the future requirements. So, we chose Sokkia products from Sigma Enterprises.” Ibrahim Yahya said

WHY SOKKIA?

“As the chief surveyor, the most important aspect for me to have for my team is to have instruments that are faster and easy to use to obtain high quality data.

Our surveyors says that it's easy and more reliable to use Sokkia instruments such as Levels, CX Total Stations and GRX2 GNSS Receivers. We have purchased more than 10 instruments for this project and based on the feedback from our team we are planning to purchase more in the future as we have concluded that we can always trust Sokkia products.

Technically, Sokkia instruments are excelling on site under various weather conditions. Due to the simple, easy-to-use and more powerful MAGNET™ field to office and office to field real-time stream, we enjoy the benefit of swapping instruments within our projects in UAE, and another important thing is that the battery is same for Sokkia Total Stations and GNSS Receivers, which helps us in a big way to keep us charged and make us multiply in surveying possibilities as the hardware is widely supported by various global software.” Ibrahim Yahya said.

LOCAL SUPPORT

“In addition, the support from Sokkia's UAE dealer Sigma Enterprises is much helpful as they provide professional support during our purchase, on site/field and even at our office to train our staff about the software or any kind of post production requirements, and most importantly after sales service including instruments calibration and repair. This is what we consider as one of the most important aspects when it comes to procurement of instruments or equipment.” Ibrahim Yahya said.
