*Aluminium Balustrades • Fences • Gates*

## *Superior Balustrades*

are among the strongest and most durable balustrade systems available.

The design of our products come under constant review with independent verification and laboratory testing by a NZ Chartered Professional Engineer.

### **Our Balustrade Systems:**

- Comply with the Building Act 2004 and Regulations.
- Comply with the loading code in NZS 4203 & AS/NZS 1170.
- Comply with the glazing code in NZS 4223.
- Comply with the Building Code Clauses:
  - B1 – (Structure)
  - B2 – (Durability)
  - F2 – (Hazardous Building Materials)
  - F4 – (Safety from Falling)
- Comply with the Swimming Pool Fencing Act 1987
- Come finished in Anodized Coatings and Powder Coatings applied in ISO Accredited Plants which are covered by appropriate warranties. Applications for warranties must be made from Head Office prior to the placement of orders.

Producer Statements for Design (PS1) are available, as recommended by:

- The Institute of Professional Engineers of NZ (IPENZ),
- The Association of Consulting Engineers of NZ (ACENZ), and
- The NZ Institute of Architects (NZIA).

Producer Statements shall be requested from Head Office prior to applying for a Building Consent.
