ZEO ULTRA LIGHT

The lightest mobility scooter in the world

> Takes apart and reassembles in seconds
> Exceptional legroom even for the taller user
> Heaviest part when disassembled under 10kg
> All-round suspension offers superbly comfortable ride
> Supplied as standard with ultra-lightweight lithium battery
> Designed & manufactured with lightweight aircraft-grade aluminium components

www.elitemobility.co.uk
**Designed to be light**
The new generation scooter has been designed and manufactured to be light. It’s extremely lightweight aircraft-grade aluminium components combined with the exceptionally light but powerful lithium battery pack makes this scooter the lightest 4-wheel, car transportable, full suspension scooter in the world!

**Making life easier for you**
Its unique splitting design is fast and easy to take apart and reassemble with the heaviest disassembled part weighing under 10kg! This makes it so much easier to handle especially when lifting is required such as putting into or taking it out of your car.

**Also super comfy**
Not only super light, also super comfy with its advanced engineered adjustable front and rear suspension and luxury padded supportive seat guaranteeing you a comfortable and enjoyable driving experience. Other great features include the uniquely designed shrouding which allows users of all heights (including taller users) a spacious and comfortable seating position while the easy-to-access tiller charger port, powerful front LED light and secure-grip tiller are all included as standard.
