

ASBESTOS PLAN

The Jeff Davis County Board of Education has a management plan on file to notify all persons who work or attend class in the Jeff Davis county School System, that a current asbestos plan has been developed for friable and non-friable asbestos containing building material.

This plan includes six-month surveillance inspections to determine if response actions need to be scheduled. The plan shows locations of ACM and assumed ACM.

Anyone can review or obtain a copy of this management plan at the Board of Education office during regular operation hours
